

Community Rehabilitation Best Practice Standards

Northern Ireland

April 2024

These standards outline key responsibilities and measures for all those delivering, planning, providing and participating in rehabilitation. They are applicable to all clinical conditions including multimorbidity and across all settings and sectors.

Introduction

The needs of many people who require community rehabilitation are not met. There is widespread unwarranted variation in the provision and quality of rehabilitation which has been worsened by the Covid19 pandemic. Without access to high quality, community-based rehabilitation, people will continue to be driven towards the most expensive parts of the health and social care system, such as A&E and secondary care.

The Health and Wellbeing 2026 – Delivering Together plan sets out a more personalised, preventative and integrated approach to health and social care, that takes account of social, physical, psychological and mental health needs. Covid has reinforced the message that we must do things differently. Traditional models of rehabilitation and workforce configuration based on a single condition and/or diagnosis are no longer appropriate, given the current context of an ageing population with increasingly complex needs including multiple long-term conditions (LTCs).

The Community Rehabilitation Alliance (CRA) identified the need for robust quality standards in community rehabilitation to be developed, to be used by everyone involved in commissioning, delivering and/or receiving community rehabilitation services.

Purpose

This guidance provides a number of recommendations and standards which have been systematically developed to guide the development, delivery and monitoring of high-quality person centred rehabilitation. It will provide a basis from which community rehabilitation services can deliver high quality person centred evidence based rehabilitation to their people and populations and seek to decrease both local and regional variation.

These recommendations and standards apply to adult community rehabilitation services and will improve individual and population-based health and well-being. This document takes a person-centered, needs led approach rather than by diagnosis and/or condition approach and aims to:

- Lead to clearer pathways for people with disability
- Enable supported self-management and goal setting
- Streamline pathways by facilitating early supported discharge from hospitals and preventing avoidable re-admission
- Ensure care delivery within people’s own homes and communities wherever possible

This audiences for this guidance include:

- Adults who may need to access community rehabilitation services
- Families and carers of community service users
- Clinicians and managers delivering community rehabilitation
- Policymakers, commissioners and providers of community rehabilitation services.

Purpose (continued)

- Directors of Rehabilitation
- Rehabilitation networks

This document uses the terms ‘clinician’, ‘director’ and ‘commissioner’ to describe the people in health and care services involved in creating and delivering community rehabilitation services.

This document uses the word ‘people/person’ to describe people using community rehabilitation services to address their needs. The use of the biopsychosocial model ensures that clinicians respect people as individuals. It is expected that:

- A person’s family will always be made welcome, and be involved, provided this is

what the person wants

- Information sharing with wider family is only undertaken with the person’s explicit consent
- Information is provided in formats that are accessible to people with sensory, cognitive and communication difficulties including those with English as a Second Language (ESL)
- Everyone is aware of the diverse social and cultural needs of their local population
- Everyone is aware of their responsibilities to underserved populations and take steps to minimise health inequalities

Definition of Community Rehabilitation

For the purposes of this guidance, community rehabilitation is defined as all rehabilitation delivered to a person in any setting outside a hospital. This description includes all rehabilitation delivered by Health and Social Care Trusts and any rehabilitation provided in community hospitals or care homes. It is provided by a multidisciplinary team, to optimise function, social participation and improve health and includes:

- biopsychosocial assessment
- information provision
- person activation

(i.e. building knowledge, skills and confidence)

- shared decision making
- goal oriented interventions
- support for self-management
- opportunity for behaviour change

In addition, the multidisciplinary team:

- have a single line management
- are locality based, treat people in their own homes and/or within environments meaningful to the person
- meet regularly either virtually or in-person
- have shared resources and processes

Definition of Community Rehabilitation (continued)

Long Covid clinics	Pulmonary rehabilitation	Cardiac rehabilitation	Musculoskeletal rehabilitation	Back pain services	Amputee rehabilitation
Community physiotherapy	Community occupational therapy	Community speech & language therapy	Assistive technology services	Wheelchair services	Orthotics services
Prosthetics services	Social services adaptation & equipment	Community rehabilitation team	Community neurorehabilitation	Brain injury rehabilitation	Multiple sclerosis team
Early supported discharge team	Vocational rehabilitation service	Spasticity services	Hearing impaired services	Low vision services	Intermediate care
Specialist nursing homes	Community rehabilitation beds	Transitional care services	Reablement teams	District nursing services	Care management

Figure 1. To demonstrate the range of community rehabilitation services

Key Recommendations for Systems

To enable the delivery of high quality community rehabilitation services, it is recommended that Health Boards (HBs):

- 1 Designate a director at executive level with direct responsibility for rehabilitation services, if this is not automatically the Director of Therapy
- 2 Establish a local provider rehabilitation network on a regional footprint to include primary, secondary, tertiary health care, mental health, social care, independent and third sector providers
- 3 Review existing rehabilitation services to remove silos of care and duplication of services
- 4 Publish an annual report on rehabilitation

Community Rehabilitation Recommendations — Summary Standards

	Person	Clinician	Rehabilitation Lead	Network	Commissioner	Social Care Provider
1 Referral processes are explicit, easy, efficient and equitable	Knows how and when to get help, when in need of rehabilitation, either through GP or self-referral	Refers people to the right services by using a rehabilitation directory of services	Provides a rehabilitation directory, and ensures equality of access and provision of services	Determines how referral pathways can best be distributed, and establishes information systems for social care	Ensures resources are appropriately focussed and inequalities of access are minimised by monitoring groups that are underserved	Refers people using a rehabilitation directory, and supports people to navigate the rehabilitation pathways
2 Rehabilitation interventions are timely, co-ordinated and prevent avoidable disability	Gets seen by the right person at the right time, and knows who co-ordinates rehabilitation	Undertakes assessments, shares information across the network, and knows local resources	Recognises and manages care co-ordination, and delivers/monitors mandatory training	Develops referral systems, and ensures people are seen in a timely, co-ordinated way	Ensures rehabilitation pathway is timely, efficient and effective for different person groups	Receives and shares information about the co-ordinated care of people
3 Rehabilitation interventions meet peoples' needs and are delivered in appropriate formats	Knows they have the best rehabilitation option to suit them	Is trained to deliver evidence-based care and shares decision making with people	Maps, develops and describes pathways for people with different needs	Shares training resources and supports the implementation of best practice recommendations	Maps pathways, analyses local population needs, and designs community rehabilitation	Understands the rehabilitation options and supports people in their decision making

Community Rehabilitation Recommendations — Summary Standards (continued)

Recommendation	Person	Clinician	Rehabilitation Lead	Network	Commissioner	Social Care Provider
4 Rehabilitation pathways should meet needs and be delivered locally with access to specialist services	Gets co-ordinated support for physical and mental health, and can access the equipment needed	Works with local services but refers to specialist services if needed to ensure the best outcomes	Ensures information can be shared and provides resources to be shared with people	Ensures systems are integrated and care packages are joined up across the course of the disease	Commissions local and out-of-area services to meet peoples' needs and optimise outcomes	Supports people to attend appointments and to obtain equipment
5 Rehabilitation programmes should enable optimisation, self-management and review	Has the information, equipment and support they need to look after their condition	Works independently with appropriate workload to support people to maintain their independence	Manages staffing to deliver timely and effective rehabilitation	Develops supported self-management approaches and shares training resources	Commissions needs-led, integrated community rehabilitation services and flexible pathways	Supports people to do the activities that are important and appropriate for them
6 Rehabilitation services are well led, adequately resourced and linked to other services	Helps record rehabilitation progress and goals, and can give feedback	Collects data including person goals and service activity, and contributes to audits	Conducts audits and benchmarks services, and identifies service priorities	Helps design and develop services that address unmet needs, and enables sharing of information	Commissions the development of data collection and defines how success is evaluated	Supports people to discuss their progress and to give feedback

Community Rehabilitation Recommendations — Summary Standards (continued)

Recommendation	Person	Clinician	Rehabilitation Lead	Network	Commissioner	Social Care Provider
7 Rehabilitation services involve families	Family members are made welcome and empowered as important parts of the rehabilitation process	Identifies people relying on carers, and encourages families to take part and contribute to care	Develops pathways to support families and monitors their experience	Helps design services that meet the needs of families, friends and carers	Commissions services that support families of people with disabling conditions	Keeps families informed about changes in function

Community Rehabilitation Standards — Full version

Recommendation 1

Referral processes are explicit, easy, efficient and equitable

Key themes: (a) Self-referral (b) Single point of access (c) Population identification and segmentation (d) Minimising health inequalities.

The person	The clinician	The director
<p>When I need rehabilitation</p> <ul style="list-style-type: none"> – My GP can refer me – I can refer myself by contacting the service directly <p>I know how to do this because</p> <ul style="list-style-type: none"> – There is a service directory which tells me who and how to contact the service <p>I know when to do this because</p> <ul style="list-style-type: none"> – My health care practitioner has explained this to me 	<p>There is a rehabilitation directory which contains the information I need to refer a person to the services they need.</p> <p>If I am co-ordinating the rehabilitation, I can provide the means for the person to contact me directly. At discharge, I provide the person with a written rehabilitation plan which includes</p> <ul style="list-style-type: none"> – Self management advice – How to maintain or progress function – Contact details for any next steps in the rehabilitation journey – Triggers for review – Routes to review 	<p>I provide a directory of rehabilitation services.</p> <p>I ensure that information that specifies the self-referral pathway is easily available.</p> <p>I ensure rapid and skilled triage of people at the point of entry.</p> <p>The clinicians I manage set their appointment times so that they can support people to self-manage, including learning how and when to self-refer.</p> <p>I work within the rehabilitation network to ensure that the written and online material meets the needs of the local community.</p> <p>I work with the rehabilitation network and social care providers to ensure that when a person who is receiving social care is referred for community rehabilitation the social care provider is informed.</p> <p>I ensure equity of access and provision.</p> <p>I monitor referrals to ensure that underserved populations are not neglected.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 1

Referral processes are explicit, easy, efficient and equitable

Key themes: (a) Self-referral (b) Single point of access (c) Population identification and segmentation (d) Minimising health inequalities.

The network	The commissioner	The Social Care Provider
<p>The rehabilitation network works with people, carers and local communities as partners to determine how referral pathways can be disseminated effectively to those that may need to access rehabilitation services.</p> <p>The rehabilitation network establishes systems that ensure that when a person who is receiving social care is referred for community rehabilitation the social care provider is informed.</p>	<p>I have completed a joint strategic needs assessment for rehabilitation services identifying current inequalities in access (and outcomes and future potential demand).</p> <p>I ensure the commissioning process includes monitoring of underserved populations.</p> <p>I work with the network and local health care organisations to ensure that inequalities of access are progressively minimised.</p> <p>I use population health management information to understand the needs of the local population and therefore ensure resources are appropriately focussed.</p>	<p>I know how and when to make a referral to the community rehabilitation service.</p> <p>I am aware of the range of services available to people I care for through reference to the rehabilitation directory.</p> <p>I am informed when a community rehabilitation referral has been made.</p> <p>I know how and when to contact the rehabilitation service for a person I care for.</p> <p>I support people I care for to navigate the community rehabilitation pathway.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 2

Rehabilitation interventions are timely, co-ordinated and prevent avoidable disability

Key themes: (a) early, comprehensive, biopsychosocial assessment (b) co-ordination of care including (c) information sharing resulting in (d) a clear person journey.

The person	The clinician	The Service/ Rehabilitation Lead
<p>When I am seen</p> <ul style="list-style-type: none"> – It is by the right person. – It is at the right time. – Everyone I see has all the information from other services that they need <p>I know who is responsible for co-ordinating my rehabilitation and how to contact them.</p>	<p>I can undertake a needs led, biopsychosocial assessment.</p> <p>I can work with other disciplines when this would benefit the person.</p> <p>I can share information, including up-to-date investigation, medication and test results across the network easily.</p> <p>I am aware of local resources which may facilitate social prescribing and ongoing activity.</p> <p>I know who is responsible for each aspect in the rehabilitation prescription.</p>	<p>I recognise the importance and complexity of the care co-ordination role by allowing enough time to be allocated to this in peoples job plans.</p> <p>I deliver and monitor mandatory training in needs led assessment and the biopsychosocial model.</p> <p>I work to ensure that paperwork and IT systems support interdisciplinary and needs led approaches including with social care.</p> <p>I ensure that information can be shared between systems easily and effectively.</p> <p>I facilitate case management discussion.</p> <p>I ensure that all team members have a shared understanding of admission and discharge procedures.</p> <p>I recognise the critical contribution social services and care services make</p> <ul style="list-style-type: none"> – to improving rehabilitation outcomes – to care co-ordination

Community Rehabilitation Standards — Full version (continued)

Recommendation 2

Rehabilitation interventions are timely, co-ordinated and prevent avoidable disability

Key themes: (a) early, comprehensive, biopsychosocial assessment (b) co-ordination of care including (c) information sharing resulting in (d) a clear person journey.

The network	The commissioner	The Health and Social Care Co-ordinator
<p>The network involves multiple providers, including primary, secondary and tertiary care, physical and mental health, and health and social care providers working together to ensure people are seen in a timely, and coordinated way.</p> <p>The networks engage with providers to ensure information sharing with appropriate governance.</p> <p>The network develops systems that ensure referrals and transfers of care are streamlined throughout the network.</p> <p>The network supports collaborative working practices.</p> <p>The network shares training opportunities and resources.</p> <p>The network is supported by both local health and social care leaders and providers and the community planning through the local councils, as well as the rehabilitation lead and commissioner.</p>	<p>I have walked the ‘rehabilitation pathway’ with all members of the rehabilitation network including people, carers and local communities as partners to be sure it is timely, efficient and effective for different person groups.</p>	<p>I am confident that the people I support receive the right service at the right time.</p> <p>Information is shared with me about the person I support; including up-to-date investigation, medication and test results.</p> <p>I feel confident sharing information about the person I support.</p> <p>I have the information I need to provide collaborative care.</p> <p>I know who is responsible for co-ordinating my client’s care, and how to contact them directly.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 3

Rehabilitation interventions meet people’s needs and are delivered in an appropriate format

Key themes: (a) person centred rehabilitation (b) information provision (c) person activation (d) shared decision making (e) goal oriented programmes (f) rehabilitation prescription plan.

The person	The clinician	The Service/Rehabilitation Lead
<p>I know I have the best rehabilitation for me because</p> <ul style="list-style-type: none"> – I am given information about different rehabilitation options. – I can discuss these options with the healthcare professional. – I have time to consider the options. – I can choose the best option for me. – My choice of treatment is written down for me in a ‘rehabilitation prescription’ – I can choose different rehabilitation when needed. 	<p>I am trained in</p> <ul style="list-style-type: none"> – person activation – shared decision making – simple behaviour change techniques <p>I deliver evidence-based care.</p> <p>I have the time and skills needed to support necessary change to help people’s meet their goals.</p> <p>I co-produce rehabilitation prescription with people.</p> <p>I share the rehabilitation prescription with relevant providers across the network.</p> <p>I can offer people a menu of different options for their treatment.</p>	<p>I deliver and monitor mandatory face to face training in</p> <ul style="list-style-type: none"> – person activation – shared decision making – simple behaviour change techniques <p>I work with commissioners, local clinicians and the rehabilitation network to map current pathways, identify service duplications and service gaps.</p> <p>I work with local clinicians and the rehabilitation network to develop clear pathways for people with different needs, including those with multimorbidity, and with options for people with different levels of activation.</p> <p>I work with local clinicians and the rehabilitation network to define and describe those pathways so that clinicians and people can chose the best pathway for each individual.</p> <p>I ensure staff have time to provide information, undertake person activation, and shared decision making, recognising that ‘front-ending’ clinical consultations will save time in the long term.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 3

Rehabilitation interventions meet people’s needs and are delivered in an appropriate format

Key themes: (a) person centred rehabilitation (b) information provision (c) person activation (d) shared decision making (e) goal oriented programmes (f) rehabilitation prescription plan.

The network	The commissioner	The Health and Social Care Co-ordinator
<p>The network shares training resources in person activation.</p> <p>The network shares training resources in shared decision making.</p> <p>The network supports the service to implement best practice recommendations and deliver evidence based rehabilitation.</p> <p>The network supports the integration of research into practice.</p>	<p>I work with the Rehabilitation Lead, local clinicians and the rehabilitation network to map current pathways, identify service duplications and service gaps.</p> <p>I have considered levels of person activation when analysing local population needs and designing community rehabilitation.</p> <p>I have considered levels of person activation as part of outcomes-based commissioning.</p>	<p>I have the information I need to understand the different rehabilitation options that are available to the person I support.</p> <p>I operate within a Multi-Disciplinary Team and understand the roles of the other team members.</p> <p>I can support people in their decision making around the rehabilitation that best meets their need.</p> <p>I have a copy of the rehabilitation prescription for the person I support and am confident to support its delivery.</p> <p>I have the time and skills to support people to engage in their rehabilitation.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 4

Rehabilitation pathways should meet needs and be delivered locally with access to specialist services

Key themes: (a) needs led rehabilitation (b) integrated services (10, 20, 30 health and social care, physical and mental health) (c) locality based care (d) access to equipment (e) access to specialists and specialist services.

The person	The clinician	The Service/Rehabilitation Lead
<p>I have co-ordinated support for both my physical and mental health needs.</p> <p>I am seen locally, where possible.</p> <p>When the service I need is not available locally, I am referred onto a specialist service.</p> <p>I am able to access the equipment I need and I am taught how to use and maintain it.</p> <p>I feel confident to progress my rehabilitation treatment programme as needed.</p>	<p>I know when and how to refer on, and can manage transitions between services effectively.</p> <p>I can work with other local services and with mental health teams in a timely and integrated way to ensure the best outcomes for people.</p> <p>I can access advice from specialist services easily.</p> <p>I am able to refer on to specialist services when indicated.</p> <p>I am aware of and can provide advice about Trust services, third sector/ community and voluntary and other services as well as specialist health services.</p> <p>I feel confident to progress/adapt the person’s rehabilitation treatment programme as needed.</p> <p>I have access to the resources to support people to progress their rehabilitation treatment programmes.</p>	<p>I ensure information can be shared, with appropriate governance, between different services and care providers.</p> <p>I provide multidisciplinary input to care homes.</p> <p>I provide the resources which allow people to progress their rehabilitation including equipment provision, short telephone contacts, emails, texts, online support.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 4

Rehabilitation pathways should meet needs and be delivered locally with access to specialist services

Key themes: (a) needs led rehabilitation (b) integrated services (10, 20, 30 health and social care, physical and mental health) (c) locality based care (d) access to equipment (e) access to specialists and specialist services.

The network	The commissioner	The Health and Social Care Co-ordinator
<p>Within the rehabilitation network, specialist services work with place based services to ensure comprehensive care packages are joined up across the disease trajectory.</p> <p>Within the rehabilitation network, commissioners and providers work together to ensure integrated systems.</p> <p>Through the network, providers work collaboratively to manage people’s needs.</p>	<p>I ensure that people can have their needs met, by commissioning local services.</p> <p>I recognise that people may benefit from working with two services over the same period to optimise outcomes.</p> <p>I ensure services including health care for the elderly and rehabilitation medicine services are delivered in care homes.</p> <p>Where local services cannot meet specialist needs I support ‘provider collaboratives’ and commission ‘out of area’ services.</p> <p>Where an individual has highly specialist needs I ensure that the pathways for commissioning these are clear. This also includes major housing adaptations, specialised equipment and assistive technology including wheelchair provision.</p>	<p>I support people to attend appointments.</p> <p>When equipment is needed I can</p> <ul style="list-style-type: none"> – Obtain and arrange maintenance of equipment. – Ensure the clinician is trained appropriately to support people to use the equipment.

Community Rehabilitation Standards — Full version (continued)

Recommendation 5

Rehabilitation Programmes should enable optimisation, self-management and review

Key themes: (a) optimisation of function (b) supported self management (c) regular review (d) long term conditions registers

The person	The clinician	The Service/ Rehabilitation Lead
<p>I am helped to do things that are important to me.</p> <p>The support I receive seems useful to me.</p> <p>I have been told about other services that may be useful.</p> <p>I have been given the information I need.</p> <p>I know what I have to do to look after my condition.</p> <p>I know when to ask for help.</p> <p>If I need to be seen again, I know when this will be.</p> <p>I have the equipment I need and I know how to use it.</p> <p>I know how and when to ask for a review.</p> <p>I am confident I will be reviewed when I need it.</p>	<p>I have an appropriate case load, (that allows time to assess person activation, undertake shared decision making, and goal setting with the person, and support self-management).</p> <p>I have the autonomy to decide the most effective course of rehabilitation and I have the time to deliver the required interventions</p> <p>I am aware of diverse social and cultural needs, and am confident in providing effective support.</p> <p>I support people to maintain their independence, and social roles, including work.</p> <p>I have the time to work with a person to support their self-management.</p> <p>I am able to work with people to agree a review date, or when they should self-refer.</p>	<p>I have the budget to ensure adequate staff numbers, and expertise to deliver timely and effective treatment.</p> <p>I deliver and monitor mandatory face to face training in supported self-management.</p> <p>The service I manage provides generic and condition specific structured education courses, both digital and face and face- including accessible psychological support (within the context of condition adjustment and condition management).</p> <p>I ensure the long term conditions register is maintained and people are offered an annual review.</p> <p>I provide practice placements to support the ongoing workforce supply for effective rehabilitation programmes.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 5

Rehabilitation Programmes should enable optimisation, self-management and review

Key themes: (a) optimisation of function (b) supported self management (c) regular review (d) long term conditions registers

The network	The commissioner	The Health and Social Care Co-ordinator
<p>The rehabilitation network works co-operatively, including people with lived experience, to develop supported self-management approaches including health coaching, self-management education and peer support.</p> <p>The network shares training resources in supporting self-management.</p> <p>The network provides appropriate psychological support within a rehabilitation context and facilitate mental health care where needed (by onward referral) under a matched care and collaborative care approach.</p> <p>The network shares/provides training in best practice for the rehabilitation pathways and programmes provided in the system.</p>	<p>I commission needs led, integrated community rehabilitation services particularly focussing on</p> <ul style="list-style-type: none"> – Integrated physical and mental health services – Integrated health and social care <p>I commission specialist services with clear access pathways.</p> <p>I commission flexible pathways based on people’s need, and outcomes focussed not level of intervention.</p> <p>I commission vocational rehabilitation services.</p> <p>I commission services that support self-management including health coaching, self-management education and peer support.</p> <p>I commission a long term conditions register which allows regular review of people with complex disability. I work with local communities and councils to ensure accessibility for populations to support rehabilitation.</p>	<p>I support people who draw from services to do the activities that are important to them.</p> <p>I support people who draw from care to receive support that is appropriate for their social, occupational and cultural needs.</p> <p>I support people who draw from care to feel confident in requesting longer access to rehab if they need it.</p> <p>I know how and when to ask for a review for the person I support.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 6

Rehabilitation services are well led, adequately resourced and networked to other services

Key themes: (a) audit, service evaluation and research (b) defining core data, (c) linking data collection to service development.

The person	The clinician	The Service/Rehabilitation Lead
<p>I have been asked to complete questionnaires that record my rehabilitation progress and goals.</p> <p>I have opportunities to discuss my progress towards my rehabilitation goals.</p> <p>Providing feedback is easy.</p> <p>I know how my feedback is used.</p> <p>I can see how feedback is used in ‘you said, we did’ communications.</p>	<p>I have regular clinical supervision, to support my role delivery.</p> <p>I collect data as part of my job plan, including PROMS, PREMS, person goals and service activity.</p> <p>I am aware of audits and service evaluations running in my department.</p> <p>I am expected to contribute to audits, service evaluations and quality improvement initiatives.</p> <p>I understand where the data I collect is sent.</p> <p>I understand how the data I collect gets used because there is regular feedback.</p> <p>There is a blame free culture which allows me to acknowledge and learn from errors</p>	<p>I ensure the appropriate governance of the community rehabilitation service.</p> <p>I conduct audits and benchmark my services against similar services elsewhere.</p> <p>I identify service priorities and link, collate and review data to these.</p> <p>I ensure staff are aware of the data analysis and how this feeds into service design.</p> <p>I ensure that the information system is appropriate and sufficient to gather and review information on rehabilitation services in order to monitor quality and outcomes.</p> <p>I support a learning culture around compliments, complaints, adverse and serious incidents.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 6

Rehabilitation services are well led, adequately resourced and networked to other services

Key themes: (a) audit, service evaluation and research (b) defining core data, (c) linking data collection to service development.

The network	The commissioner	The Health and Social Care Co-ordinator
<p>The rehabilitation network works with people, carers and local communities as partners to help design services that address unmet need.</p> <p>The network links with other networks to support service development and design.</p> <p>The rehabilitation network provides mechanisms for sharing good practice and audit findings across the network.</p>	<p>I define the core data set and determinants of success on which to evaluate the service provision.</p> <p>I benchmark the rehabilitation services and commission for progressive improvement in person access, experience and outcomes.</p> <p>I commission the development of data collection processes for underserved populations.</p> <p>I support services to apply for innovation funding.</p> <p>I support the development of data sets for rehabilitation that offer live feedback and comparisons with national systems.</p>	<p>I can support people drawing from services to access opportunities to discuss their progress towards their rehabilitation goals.</p> <p>I can support people who use services to feedback at appropriate points during their rehabilitation services.</p> <p>I am aware of different ways to feedback (verbally, in writing, online, through questionnaires).</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 7

Rehabilitation Services involve Families

Key themes: (a) audit, service evaluation and research (b) defining core data, (c) linking data collection to service development.

The friends and family	The clinician	The Service/ Rehabilitation Lead
<p>What my family experience</p> <p>I am made welcome at my family members appointments.</p> <p>I have the opportunity to ask questions.</p> <p>I am involved in the development of the rehabilitation plan.</p> <p>I can choose how much I am involved in the care and treatment of my family member.</p> <p>I am trained in the use of equipment that is provided.</p> <p>I know where to go for support, (practical, emotional, financial, condition specific), either through the voluntary sector or statutory services.</p> <p>I have the opportunity to feed back about my experience with the service.</p>	<p>I am able to identify which people rely on carers.</p> <p>I encourage families to attend appointments.</p> <p>I encourage families to ask questions.</p> <p>I am able to include education and training of carers/family in interventions, that optimise generalisation of skills for the person in their usual environment.</p> <p>I involve families in the development of the rehabilitation plan.</p> <p>I enable the families to have shared knowledge and expectations of rehabilitation.</p> <p>I am confident in engaging carers in the rehabilitation treatment plan to enable its successful implementation.</p> <p>I make sure families are familiar with and confident in the use of any equipment that has been provided.</p> <p>I can recognise when families need support and refer to specialist services when needed.</p>	<p>I have developed pathways to support families.</p> <p>I monitor the experience of families by obtaining feedback.</p>

Community Rehabilitation Standards — Full version (continued)

Recommendation 7

Rehabilitation Services involve Families

Key themes: (a) audit, service evaluation and research (b) defining core data, (c) linking data collection to service development.

The network	The commissioner	The Health and Social Care Co-ordinator
The rehabilitation network works with people, carers and local communities as partners to help design services that meet the needs of families, friends and carers.	I commission services that support families of people with disabling and long term conditions.	I keep families informed about changes in function and ongoing care plans.

Appendix 1 — Expert Reference Group

An external reference group (ERG) for this work was appointed in 2021. Its members were identified by inviting member organisations of the Community Rehabilitation Alliance (CRA) to nominate individuals with relevant expertise. This ensured representation from a broad range of disciplines, working in a variety of settings, academic expertise and wide user representation, through the people charities.

Its role included:

- Ensuring PPI throughout the development, dissemination and implementation of the guidance
- Deciding the scope and search mechanisms
- Defining a system for the evaluation and presentation of evidence to underpin the guideline recommendations, and
- Deciding the framework for analysing and presenting the guideline
- Overseeing the assembly and evaluation of evidence in accordance with that system
- Agreeing the final production of guidance tools

The ERG meet on four occasions:

- To agree the scope of the work, identify key themes, and agree the methodological approach
- To review evidence, agree major content and identify further work
- To review evidence, agree major content and identify further work
- To finalise recommendations and agree dissemination strategies

Person and public involvement was ensured through firstly involvement of service user organisations from the outset, who helped shape the guidance by:

- Agreeing the search strategy
- Creating the analytic framework
- Interpreting the data
- Developing recommendations

Appendix 2 — Methodology

A systematic review of the literature was undertaken, including the ‘grey literature’. Five key pieces of guidance were agreed as ‘core’ by the ERG.

These five below were examined and an analysis framework and preliminary codes identified.

[NHS Rehabilitation Commissioning Guidance for England](#)

[WHO Community Rehabilitation Guidance](#)

[NHS RightCare Community Rehabilitation Toolkit](#)

[The National Service Framework for Long-Term Conditions](#)

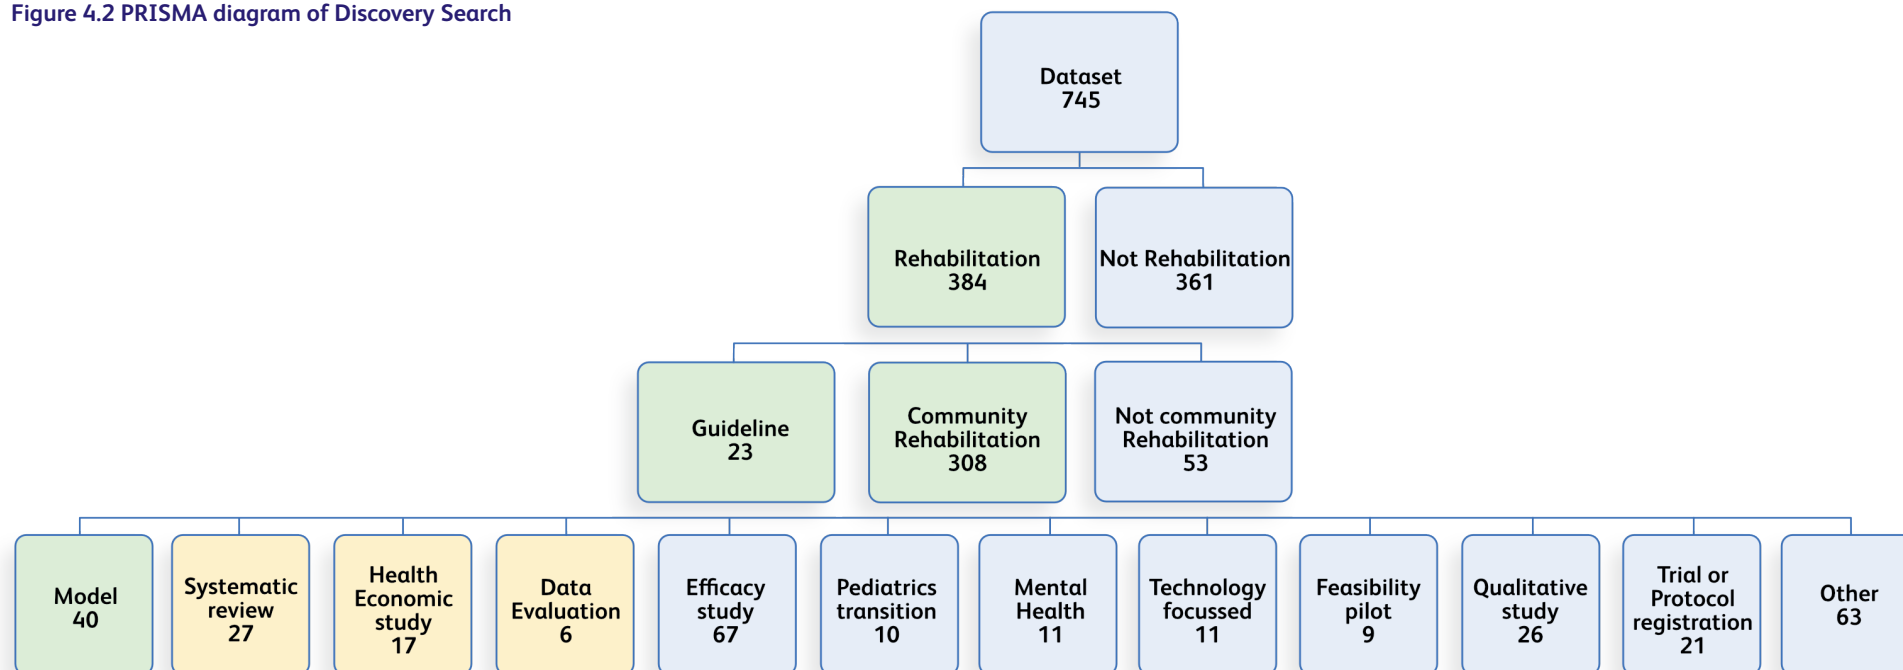

[BSRM Guidance on Specialist Community Rehabilitation](#)

This created a framework for further analysis. A further 48 guidance publications were coded using the framework which was modified as the need arose. This followed a comprehensive database search using PubMed, EMBASE, Cochrane Library, PEDro and Psychlit to search clinical practice guidelines (CPG) that reported on community rehabilitation. To search grey literature and CPGs repositories we used the OpenGrey, National Guideline Clearinghouse of

the Agency for Healthcare Research and Quality, Guidelines International Network (G-I- N) and National Institute for Health and Care Excellence (NICE) databases. The reference lists of most relevant CPGs and review articles was scanned for additional CPGs. The database search strategy combined the following search terms: “home based rehabilitation” OR “post ward rehabilitation” OR transitional rehabilitation OR community rehabilitation AND Model* OR Guideline* OR recommendation OR guidance OR “best practice.

Appendix 2 — Methodology (continued)

Figure 4.2 PRISMA diagram of Discovery Search

Themes were identified from these codes, from which rehabilitation principles were derived. These principles were then mapped to different components of a comprehensive rehabilitation pathway. The recommendations were informed by the coding, overarching themes and principles. The process was informed by iterative

discussions with the ERG. The recommendations were sent out to the membership organisations of the CRA for consultation and then modified following feedback.

Audit tools were developed from the recommendations and standards. A logic model

based on the findings, was also developed, as a visual way to illustrate the resources or inputs required to implement standards and recommendations.

Both are in the appendices

Appendix 3 — Evidence Review for Recommendations

ERG commentary

- Referral experience varies; clear for some disease specific conditions, variable for complex multi-morbid conditions
- Increasing capacity and grouping by need rather than diagnosis is required
- Doctors need increased awareness of the importance of early access to rehabilitation
- Referral routes should be inclusive of all clinicians
- Direct access is challenging for some patents but is appropriate, it may mask unmet needs, it is safe, effective and cost-effective
- Terminology around language to describe access and services is variable in the literature
- A single point of access is important to ensure integrated care
- Services need to target those with LTCs, poor health literacy and those in underserved populations to address health inequalities

Appendix 3 — Evidence Review for Recommendations (continued)

Recommendation 2

Rehabilitation interventions are timely, are co-ordinated both within and between services & prevent avoidable disability

ERG Commentary

- Holistic Multidisciplinary Team (MDT) assessment is required from the first person presentation
- A biopsychosocial model of care is the preferred mode
- Locality teams are most effective meeting in person or virtually depending on the needs of the team and/or service
- Information sharing is critical which must both adhere to data protection obligations and be enabled by integrated information systems across organisational boundaries
- Care co-ordination between a variety of stakeholders is required to deliver optimal rehabilitation. This role should be recognised and reflected in job plans.
- There needs to be a clear boundary of where care-coordination ends and peer support and/or social prescribing begins to monitor ongoing health behaviours

Appendix 3 — Evidence Review for Recommendations (continued)

Appendix 3 — Evidence Review for Recommendations (continued)

Recommendation 3

Rehabilitation interventions meet people's needs and are delivered in the format that is most effective for that person

ERG Commentary

- Person activation is clearly described in the literature. Different levels of person activation affect delivery of rehabilitation
- Clinical autonomy and a range of rehabilitation options are required to gain optimal results for an individual person
- Shared decision making is well-evidenced. It is appropriate in non-life-threatening situations and requires partnership between the clinician and person, information provision and training including co-production
- Rehabilitation prescriptions ought to be embedded in community rehabilitation services

Appendix 3 — Evidence Review for Recommendations (continued)

Recommendation 4

Rehabilitation pathways address both physical and mental health, are delivered locally where possible allow access to specialist services

	Access to specialist services	Adequate and timely equipment	Integrated services – health & social care	Integrated services – other	Integrated services – physical & mental health	Locate care in familiar real life situations	Needs led

Appendix 3 — Evidence Review for Recommendations (continued)

Recommendation 4

Rehabilitation pathways address both physical and mental health, are delivered locally where possible allow access to specialist services

ERG Commentary

- Integrated needs-led services are well supported in the literature and can streamline complex and silod care pathways
- Diagnosis led services are inflexible and do not meet the needs of people with multi-morbid presentations.
- Integration is required across primary, secondary and tertiary services
- Rapid access to specialist services is essential, particularly for locality based services
- Equipment provision must not be ignored and should include training for staff, the person and the wider family/carers if required

Appendix 3 — Evidence Review for Recommendations (continued)

Principle 5

The rehabilitation programme is adequate to allow optimisation of function, incorporates teaching the skills that allow maintenance of function through self-management, includes regular review for people with complex disability that is likely to deteriorate.

WHO Rehabilitation in health systems Guideline 2017 www.who.int/publications/i/item/9789241549974	✓		

ERG Commentary

- Optimisation of function is the core element of a rehabilitation intervention
- Regular review is supported in the literature and enables rehabilitation to change as the people’s need’s change
- Self-management is supported in the literature and has the key elements of Information provision, Person activation through health coaching, person education and Peer support, for example through social prescribing

Appendix 3 — Evidence Review for Recommendations (continued)

Recommendation 6

The rehabilitation service is well led, adequately staffed in terms of range of disciplines, skill mix and expertise, supported by a rehabilitation network

ERG Commentary

- Benchmarking in community rehabilitation services is challenging
- Uniformity of data sets and data collection is essential
- An interdisciplinary, multiagency workforce with strong leadership is critical to the delivery of successful community rehabilitation
- Workforce shortages across a number of healthcare groups is apparent, meaning career pathways are critical
- Leadership needs to extend all the way through the organisation to a director role that is held by a rehabilitation experienced health care professional

Appendix 3 — Evidence Review for Recommendations (continued)

Principle 7

Appendix 3 — Evidence Review for Recommendations (continued)

Principle 7

The rehabilitation service recognises the role of families, actively involves families (provided this is what the person and the family want), supports families to work with people

ERG Commentary

- The role of both formal and informal carers is important and must be recognised
- The tension between engaging families and expecting families to support rehabilitation is recognised

Appendix 4 — Audit Tools

Audit tools for people

Audit statement	Likert scale	Evidence for Director's report
How I get seen		
My GP can refer me when I need rehabilitation	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree	The self audit questionnaire for people and family's should be collected and collated routinely/regularly.
I know how to refer myself for rehabilitation	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree	This should be presented in the Rehabilitation Lead's report with an analysis of compliments and complaints.
There is a service directory which tells me about different rehabilitation services in my area	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree	Further evidence of engagement with people's, family, friends and carers to develop, and improve services should be presented based on work within the network, c.f., recommendations
I know when I should be seen again in the rehabilitation service	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree	1. The rehabilitation network works with people, carers and local communities as partners to determine how referral pathways can be disseminated effectively to those that may need to access rehabilitation services.
Who does what?		
My health care professional knows how to treat me	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree	2. The rehabilitation network works with people, carers and local communities as partners to help design services that address unmet need.
I am seen at the right time for my condition	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree	3. 'The rehabilitation network works with people, carers and local communities as partners to help design services that meet the needs of families, friends and carers'
My health care professional has all the information s/he needs from other people involved in my care	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree	
I know who is responsible for co-ordinating my care and how to contact them	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree	

Appendix 4 — Audit Tools (continued)

Audit tools for people

Making sure the treatment meets my needs	
I am given information about different treatment options	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I can discuss these options with my health care professional	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I have time to consider the options	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I can choose the best option for me	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
My choice of treatment is written down for me in a ‘rehabilitation prescription’	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I can choose a different treatment if I need to	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
Making sure I can access specialist services	
I have co-ordinated support for both my physical & mental health needs	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I am seen locally, where possible	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
When the service I need is not available locally, I am referred onto a specialist service	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I am able to access the equipment I need and I am taught how to use and maintain it	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I feel confident to progress my rehabilitation treatment programme as needed	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree

Appendix 4 — Audit Tools (continued)

Audit tools for people

How I know my rehabilitation is effective	
I have been helped to do things that are important to me	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
The support I received seems helpful to me	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I have been told about other services that may be useful	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I have been given the information I need	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I know what I have to do to look after my condition	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I know when to ask for help	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
If I need to be seen again, I know when this will be	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I have the equipment I need and I know how to use it	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I know how and when to ask for a review	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
I am confident I will be reviewed when I need it	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree
Obtaining and providing feedback	
I have been asked to complete questionnaires that record my rehabilitation progress and goals	<input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree <input type="radio"/> Disagree

Appendix 4 — Audit Tools (continued)

Audit tools for people

I have opportunities to discuss my progress towards my rehabilitation goals	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
Providing feedback is easy	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
I know how my feedback is used	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
I can see how feedback is used in ‘you said, we did’ communications	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
What my family, friends and carers can expect – FFC to complete				
I am made welcome	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
I can ask questions	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
I am involved in the development of the rehabilitation plan	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
I can choose how much I am involved	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
I am trained in the use of equipment	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
I know where to go for support	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree
I can feedback about my experience with the service	<input type="radio"/> Agree	<input type="radio"/> Mostly Agree	<input type="radio"/> Mostly Disagree	<input type="radio"/> Disagree

Appendix 4 — Audit Tools (continued)

Audit tools for clinicians

Recommendation	Self Audit Statement with Likert scale <input type="radio"/> Agree <input type="radio"/> Mostly Agree <input type="radio"/> Mostly Disagree
Referral process	
I am able to work with people to identify the triggers that mean they should be reviewed	When I discharge people, I provide them with written specific, and measurable triggers for review
As part of any discharge conversation, I am able provide written materials (a rehabilitation plan) that identifies the triggers that mean a person should be reviewed	When I discharge people, I provide a written rehabilitation plan The rehabilitation plan contains triggers for review
As part of any discharge conversation, I am able provide written materials (a rehabilitation plan that explain the referral process, including self-referral through the single point of access	My rehabilitation plans explain how the person can be reviewed
If I am the person’s keyworker, I can provide the means for the person to contact me directly	If I am the person’s keyworker, I can provide the means for the person to contact me directly
I am aware of the range of services available to people, and can identify appropriate services and their referral routes through reference to the directory	There is a rehabilitation directory which contains the information I need to refer a person to the services they need
Efficient and co-ordinated care	
I can undertake a needs led, biopsychosocial assessment	I can undertake a needs led, biopsychosocial assessment
I am able to access and work with a multidisciplinary team with relevant skills to treat each person	I can work with other disciplines when this would benefit the person
I can share information, including up-to-date investigation, medication and test results across the network easily	I can share information, including up-to-date investigation, medication and test results across the network easily

Appendix 4 — Audit Tools (continued)

Audit tools for clinicians

I can share information, including up-to-date investigation, medication and test results across the network easily	See above There is a rehabilitation directory which contains the information I need to refer a person to the services they need.
I am aware of local resources which may facilitate social prescribing and ongoing activity	
Accurate targeting of treatment	
I am trained in person activation	I am trained in person activation.
I am trained in shared decision making	I am trained in shared decision making
I am trained in simple behaviour change techniques	I am trained in simple behaviour change techniques
I have the time and skills needed to support necessary change to help people meet their goals	I have the time and skills needed to support necessary change to help people meet their goals.
I can contribute to a co-produced detailed rehabilitation prescription/plan which I share with the person and relevant providers across the network	I co-produce a rehabilitation prescription/plan with my people I share the rehabilitation plan with relevant providers across the network
I deliver rehabilitation based on the best available evidence	I am confident that my treatment is based on up to date evidence.
I can offer people a menu of different options (depending on their preference and level of activation) including ‘do nothing’, supported self-management, individual, group, F2F, blended and telehealth options	I can offer people a menu of different options for their treatment
Access to core and specialist services	
I know when and how to refer on, and can manage transitions between services effectively	I know when and how to refer on to other rehabilitation services. I am confident my referrals to other rehabilitation services are seen in a timely way.

Appendix 4 — Audit Tools (continued)

Audit tools for clinicians

I can work with other local services and with mental health teams in a timely and integrated way to ensure the best outcomes for people	There are clear pathways that allow me to refer people to mental health services. I am confident my referrals to mental health services are seen in a timely way.
I can access advice from specialist services easily	I can access advice from specialist services easily
I am able to refer on to specialist services when indicated	I am able to refer on to specialist services when indicated
I am aware of and can provide advice about local authority, third sector and other services as well as specialist health services	See above There is a rehabilitation directory which contains the information I need to refer a people to the services they need.
I feel confident to progress/adapt the person's rehabilitation treatment programme as needed	I can progress or change the person's rehabilitation as indicated
I have access to the resources to support people to progress their rehabilitation treatment programmes	I know when and how to refer on to third sector services I am confident my referrals to third sector services are seen in a timely way.
Adequate treatment programme	
I have an appropriate case load, that allows time to assess person activation, undertake shared decision making, and goal setting with the person, and support self-management.	I have an appropriate case load that allows time to assess person activation, undertake shared decision making, and goal setting with the person, and support self-management.
I have the autonomy to decide appropriate course of treatment, based on people's need, goals and outcomes	I have the autonomy to decide appropriate course of treatment, based on people's need, goals and outcomes.
I am aware of diverse social and cultural needs, and am confident in providing support that is equitable	I have attended ED&I training
I support people to maintain their independence, and social roles, including work	I support people to maintain their independence, and social roles, including work.
I have the time to work with a people to support their self-management	I have the time to work with a people to support their self-management,

Appendix 4 — Audit Tools (continued)

Audit tools for clinicians

I can signpost appropriately and effectively to information and support, including to social prescribing link workers	
Monitoring service provision	
I collect data as part of my job plan, including PROMS, PREMS, people’s goals and service activity	I collect PROMS and PREMs and report these to my department.
I am aware of audits and service evaluations running in my department	I attend regular departmental audit meetings
I am expected to contribute to audits, service evaluations and quality improvement initiatives	Quality improvement initiatives and service evaluations in my department lead to improvements in care
I understand where the data I collect is sent	
I understand how the data I collect gets used because there is regular feedback	My department analyses the data I collect. The results of the data analysis are provided to me regularly.
I work within a culture that celebrates excellence and which allows me to acknowledge and learn from errors	I work within a culture that celebrates excellence and which allows me to acknowledge and learn from errors
Family, friends and carers	
I identify which people rely on carers	I identify which people rely on carers.
I encourage families to attend appointments	I encourage families to attend appointments.
I encourage families to ask questions	I encourage families to ask questions.
I involve families in the development of the rehabilitation plan and aim to develop a shared expectations of rehabilitation	I involve families in the development of the rehabilitation plan and aim to develop a shared expectations of rehabilitation

Appendix 4 — Audit Tools (continued)

Audit tools for clinicians

I am confident in engaging carers in the rehabilitation treatment plan to enable its implementation'	I am confident in engaging carers in the rehabilitation treatment plan to help its implementation'.
I make sure families are familiar with and confident in the use of any equipment that has been provided	I make sure families are familiar with and confident in the use of any equipment that has been provided.
I can recognise when families need support and refer to specialist services when needed	I can recognise when families need support and refer to specialist services when needed.

Appendix 4 — Audit Tools (continued)

Audit tool for Directors

Referral process	Rehabilitation Lead's report
I ensure that that information that specifies the direct access pathways is easily available in a variety of formats	Summary table, of information available, formats and languages. For those disseminated through web based and digital technologies, to include appropriate metrics such as number of visits to site, number of downloads.
I ensure rapid and skilled triage of people through the access point	Time between first contact and treatment implementation
The clinicians I manage have the autonomy to set their appointment times so that people are supported to self-manage, including learning how and when to self-refer	
I work within the rehabilitation network to ensure that the written and online material meets the needs of the local community	Minutes of meetings at which this is discussed,
I monitor referrals to ensure that underserved populations are not neglected	Referral data analysed by age, gender, disability and race
I ensure reasonable adjustments are made to ensure equity of access and provision	Referral data analysed by age, gender, disability and race
I provide a directory of rehabilitation services and a map which demonstrates potential flow of people through the system	Include map, and link to directory

Appendix 4 — Audit Tools (continued)

Audit tool for Directors

Who does what	
I recognise the importance and complexity of the care co-ordination role by allowing enough time to be allocated to this in peoples job plans	
I deliver and monitor mandatory training in needs led assessment and the biopsychosocial model	Mandatory training data
I work to ensure that paperwork and IT systems support interdisciplinary and needs led approaches	A gap analysis has identified inefficiencies in the systems from a clinical perspective and the requirements for good clinical care identified. There is a strategic plan to address this.
I ensure that information can be shared between systems easily and effectively	
I facilitate case management discussion	
I ensure that all team members have a shared understanding of admission and discharge procedures	In house training
Accurate targeting	
I deliver and monitor mandatory face to face training in person activation	Mandatory training data
I deliver and monitor mandatory face to face training in shared decision making	Mandatory training data
I deliver and monitor mandatory face to face training in simple behaviour change techniques	Mandatory training data
I work with planners, local clinicians and the rehabilitation network to map current pathways, identify service duplications and service gaps	Key findings of map and gap with link to report.

Appendix 4 — Audit Tools (continued)

Audit tool for Directors

I work with local clinicians and the rehabilitation network to develop clear pathways for people with different needs, including those with multimorbidity, and with options for people with different levels of activation.	Service specifications and descriptors
I work with local clinicians and the rehabilitation network to define and describe those pathways so that clinicians and people can chose the best pathway for each individual	Service specifications and descriptors
I ensure staff have time to provide information, undertake person activation, and shared decision making , recognising that ‘front-ending’ clinical consultations will save time in the long term	Staff numbers, disciplines and grades
Core and Specialist services	
I ensure information can be shared, with appropriate governance, between different services and care providers	Evidence of how information is shared and governance maintained.
I provide multidisciplinary input to care homes	Numbers of local care homes, residents in those homes and how rehabilitation is provided.
I provide the resources to support behaviour change and which allow people to progress their rehabilitation including minor pieces of equipment, short telephone contacts, emails, texts, online support	
Adequate Treatment Programme	
I have the budget to ensure adequate staff numbers, and expertise to deliver timely and effective treatment	Staff numbers, disciplines and grades Budget, and proportion spent on staffing
I deliver and monitor mandatory face to face training in supported self-management	Mandatory training data
The service I manage provides generic and condition specific structured education courses, both digital and face and face.	Education courses offered and number of attendees

Appendix 4 — Audit Tools (continued)

Audit tool for Directors

I ensure the long term conditions register is maintained and people are offered annual review	Report on long term conditions register, numbers on register, primary and secondary diagnoses, numbers reviewed
I provide practice placements to support the ongoing workforce supply for effective rehab programmes'	Relationships with training organisations and number of placements offered each year. Feedback on placement experience
Monitoring provision	
I conduct audits and benchmark my services against similar services elsewhere	Summary audit reports
I identify service priorities and link, collate and review data to these	
I ensure staff are aware of the data analysis and how this feeds into service design	
I ensure that the information system is appropriate and sufficient to gather and review information on rehabilitation services to monitor quality and outcomes	PROMS, PREMS, person goals and service activity
I support a learning culture around compliments, complaints, adverse incidents and SUIs	Staff survey
Adequate Treatment Programme	
I have the budget to ensure adequate staff numbers, and expertise to deliver timely and effective treatment	Annual report
I deliver and monitor mandatory face to face training in supported self-management	Family surveys.

Appendix 5 — Directors Annual Report

The Directors Annual report should include:

- 1 Description of population served by the Health Board/Integrated Joint Board
- 2 Description of service planning, service budget, organisation, services including access routes, mapping and gaps
- 3 Description of number of therapists and other staff, banding, discipline, including vacant posts, staff turnover, and long term sick, and training placements offered
- 4 Description of approaches taken to ensure
 - a People are aware of access routes
 - b direct access by people
 - c integrated health and social care,
 - d integrated physical and mental health,
 - e vocational rehabilitation services
 - f relationships with independent providers and the third sector, including provision of services to care homes
 - g appropriate and easy information sharing consistent with information governance

- h identification and co-ordination of care of people with complex needs, including long term conditions registers
- i access to provider collaboratives
- j access to 'out of area' services
- 5 Approaches to and results of feedback from family, friends and carers
- 6 Compliments, complaints and SUIs
- 7 Audits, service evaluations, quality improvement initiatives

The people and their family, friends and carers

- 1 Process measures – access routes used, numbers of people seen, diagnostic categories, ED&I data, wait times, number of times people seen, Routine PREMS and PROMS and feedback from families

The clinicians

- 1 Mandatory training record with description of type and delivery of training
 - a Person activation
 - b Shared decision making
 - c Behaviour change
 - d ED&I
 - e Account of in-service training
 - f Study leave taken and funds provided

The network

- 1 Account of network structure and work streams
